

# A45 Chowns Mill Roundabout Improvements

## Phase 2 – Permanent TM

Works are planned between **March 2020** and **November 2020\***

All works within this phase will be **DAY** works

All works activities within Phase 2 will be conducted under a 'Multibloc' system that will allow for works to be undertaken during the day whilst maintaining 2 running lanes approaching the roundabout and around the gyratory

The majority of the construction works on the verges will take place within this phase with significant civils works creating new lanes to the approaches and the gyratory of the roundabout

Pedestrian routes will be closed and a Shuttle Bus system called via an Intercom will be implemented with pick-ups at;

- A5028 – Hecham Way
- A45 Westbound – Stanwick Layby
- A6 – Chowns Mill Business Park

The existing Bus Stop on the A5028 will be removed from service and a Temporary Bus Stop installed at **Hecham Way** that will provide the same service

Although the works will take place during the day, efforts will be made to mitigate noise for residents;

- Undertake noise & vibration monitoring during the works in accordance with British Standards
- Advise residents of where and what works will be being undertaken
- Utilise 'Eco' low emission, low noise plant.
- Utilise noise screens/barriers around noisier operations
- Ensure the noise commitment for the scheme is adhered to

\*Please note that construction dates are subject to change
